

Seedlist 2010

Notes on Seeds

We accept the name under which the seed is supplied by donors. No guarantee can be offered about the correct identification of the parent plant.

Seed from Cultivars doesn't usually come true.

Seed is assumed collected from cultivation unless otherwise stated.

The donors list and more details about the origin of seeds offered - self pollinated, isolated or wild collected - are given only in the official Seedlist edited by the Seed Secretary.

Note on List Format:

? = unknown species or doubtful details
